## 1. Callouts

### 1.1. Embedded cos

```
<refentry>
  <info>
    <date>2003-10-20</date>
  </info>
  <refmeta>
    <refentrytitle>gtk-options</refentrytitle>
    <manvolnum>7</manvolnum>
    <refmiscinfo class="source-name">GTK+</refmiscinfo>
    <refmiscinfo class="version">1.2</refmiscinfo>
    <refmiscinfo class="manual">GTK+ User's Manual</refmiscinfo>
  </refmeta>
  <refnamediv>
    <refname>gtk-options</refname>
    <refpurpose>Standard Command Line Options for GTK+ Programs</refpurpose>
  </refnamediv>
  <refsect1>
    <title>Description</title>
    <para>This manual page describes the command line options, which
      are common to all GTK+ based applications.</para>
  </refsect1>
</refentry>
```

Sets the “date” part of the header/footer.

Sets the “title” part.

Sets the “section” part.

Sets the “source name” part.

Sets the “version” part.

Sets the “manual” part.

Another screen including `coref` too. The first `coref` is not valid, the second one is valid. It checks also that several items in `co/@linkends` are correctly handled.

```
Volume in drive C is SYSTEM          Serial number is 2350:717C
Directory of C:\
```

```
10/17/97  9:04      <DIR>   bin
10/16/97  14:11     <DIR>   DOS
10/16/97  14:40     <DIR>   Program Files
10/16/97  14:46     <DIR>   TEMP
10/17/97  9:04      <DIR>   tmp
10/16/97  14:37     <DIR>   WINNT
10/16/97  14:25          119  AUTOEXEC.BAT
   2/13/94   6:21          54,619  COMMAND.COM
10/16/97  14:25          115  CONFIG.SYS
11/16/97  17:17      61,865,984  pagefile.sys
   2/13/94   6:21           9,349  WINA20.386 11
```

This directory holds MS-DOS™, the operating system that was installed before Windows NT™.

System startup code for DOS.

11 Some sort of Windows 3.1™ hack for some 386 processors, as I recall.

## 1.2. Programlistingco

This case checks that spaces are added to reach the expected column.

```
This is a line
This is another line
This is a third lien
```

...

2 here HermiteNormalFormIntegerMat is used

4

This programlistingco checks that you can put several markups at different column positions into the same line, and that several markups with no column specification are both put at the end of the line. The special case of a markup at the end of the last line is checked too.

```
This is a line  
This is another line  
This is a third lien
```

```
...  
The very last line
```

```
2 here HermiteNormalFormIntegerMat is used  
2
```
