

Article wrapper

Here's a methodsynopsis in a classsynopsis:

```
class Foo {  
    public static double getQuote(String symbol,  
                                  double price);  
}
```

Here's a methodsynopsis *outside* a classsynopsis:

```
public static double getQuote(String symbol,  
                               double price);
```
