

Unit Test: qandaset.005

Autolabeling test

Harald Jörg

Table of Contents

foo. A section labelled 'foo'

foo. A section labelled 'foo'

Without a surrounding section, I seem to be unable to get a qandaset processed. Let's ignore that for the moment.

Qandativ One

foo.foo.1.1.
Why is this question foo.foo.1.1?

Probably a bug in common/labels.xsl.
