
Unit Test: qandaset.005

Harald Jörg <smith@sideshowbarker.net>

foo. A section labelled 'foo'

Without a surrounding section, I seem to be unable to get a qandaset processed. Let's ignore that for the moment.

```
<qandaset defaultlabel="number">  
<qandadiv>  
<qandaentry xml:id="q1">  
<question>
```

Why is this question foo.foo.1.1?

```
</question>  
<answer>
```

Probably a bug in common/labels.xsl.

```
</answer>  
</qandaentry>  
</qandadiv>  
</qandaset>
```
